

Portable Passivation Tester for Stainless Steel Equipment

Koslow Scientific Co.'s new Passi-Flash 3036, a portable instrument for passivation and validation, works with all grades of stainless steel and is designed for convenient single-handed operation. In less than one second, the Passi-

Flash 3036 tests steel's passivity, producing an immediate pass/fail signal and displaying the measurement in millivolts. **For more information about this year's INTERPHEX trade show, go to page 34.**
